Fixed Route Bus: **Regular Service**

Paratransit: **Regular Service**

Q-LINE: **Service Suspended Until Further Notice**

Transit Center: **Restrooms Closed**

Updated June 29, 2020

## Transit Service and Safety During the COVID-19 Public Health Emergency

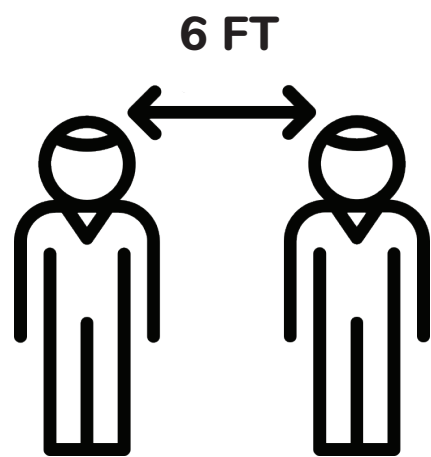

### Transit is Essential

Public transportation is an essential need for the community. While our service may adjust to meet demand and available resources, we will continue to provide transit services as long as possible. Current service information may be found at [wichitatransit.org](http://wichitatransit.org) and on our Facebook page.

### New Cleaning Procedures

Touchpoint surfaces of all buses are wiped down with a disinfectant after every trip. Bus interiors are sprayed with a disinfectant after each service day and as they cycle through routes. Buses are swapped out immediately if requested by the driver.

### Practice Social Distancing

Leave an empty row of seating in front of and behind your aisle seat. Do not sit directly next to anyone other than household family members. Keep 6-foot distancing while waiting at stops. Limit travel to essential trips only. Avoid using public transportation if you feel ill.

### Limit Contact

Use bus passes to pay fares when able to and limit the use of cash. Exit the bus through the rear doors only unless ramp assistance is necessary. Avoid unnecessary conversation with your Bus Operator. Many buses have hand sanitizer stations available for your use.
